1. A method for reporting on strategic intellectual property management utilizing a computer-implemented system, comprising:
 - (a) receiving a plurality of intellectual property identifiers identifying intellectual property;
 - (b) identifying competing activity documentation describing a plurality of competing activities;
 - (c) storing the intellectual property identifiers and the competing activity documentation in memory;
 - (d) correlating the intellectual property identifiers with the competing activity documentation utilizing a processor coupled to the memory; and
 - (e) reporting on the correlation between the intellectual property identifiers with the competing activity documentation utilizing an output device coupled to the processor.

The image shows a screenshot of a software application window. The window has a title bar with a logo on the left and three buttons (minimize, maximize, close) on the right. Below the title bar is a menu bar with four items: 'IP ASSET REGISTRATION', 'COMPETING PATENT DATA', 'CORRELATING', and 'REPORTING'. The main content area of the window is titled 'Competing Patent Data1' and contains a list of fields: 'Assignee', 'Patent No:', 'Claim', 'Figure', and 'Etc.'. The window is labeled with the number 1700.
